Acquisition of Liverpool Range Wind Farm Project

Tilt Renewables Limited ("Tilt Renewables") is pleased to announce it has today completed the acquisition of the Liverpool Range Wind Farm ("LRWF") project from Epuron Pty Ltd.

LRWF is a new wind farm development project located approximately 370 km north-west of Sydney between the townships of Coolah and Cassilis in the Upper Hunter Region of New South Wales. The project received Development Consent from the State of NSW for up to 267 turbines in March 2018, and federal Environment Protection and Biodiversity Conservation (EPBC) Act approval in June 2018. When fully constructed, the project could add up to 1,000 MW of new renewable energy generation to NSW and be the largest wind farm project in Australia.

"We are delighted to add the Liverpool Range Wind Farm project to our development pipeline and deliver on our vision to be a leading developer and owner of renewable energy generation in Australia and New Zealand" said Deion Campbell, Tilt Renewables Chief Executive.

Together with the Rye Park Wind Farm project, Tilt Renewables now has over 1.3 GW of late-stage wind farm development projects in NSW and is well placed to play a major role in helping the State transition to a greater mix of renewable energy generation over the coming years.
