Note some cash flows above are directed through an intercompany account. The cashflow statement above has been prepared on the assumption that these transactions are equivalent to cash in order to present the total cashflows of the entity.

#### (1) Accounting policies

Infratil Limited ('the Company') is a company domiciled in New Zealand and registered under the Companies Act 1993. The Company is listed on the NZX and ASX, and is an issuer in terms of the Financial Market Conducts Act 2013. The financial statements have been prepared in accordance with New Zealand Generally Accepted Accounting Practice ('NZ GAAP') and comply with New Zealand equivalents to International Financial Reporting Standards ('NZ IFRS') and other applicable financial reporting standards as appropriate for profit-oriented entities. The presentation currency used in the preparation of these financial statements is New Zealand dollars, which is also the Company's functional currency, and is presented in \$ thousands unless otherwise stated. The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated. Comparative figures have been restated where appropriate to ensure consistency with the current period.

The financial statements comprise statements of the following: comprehensive income; financial position; changes in equity; cash flows; significant accounting policies; and the notes to those statements are contained on pages 5 to 17 of this report. The financial statements are prepared on the basis of historical cost, except financial derivatives valued in accordance with accounting policy (C).

#### (A) Basis of preparation

#### Accounting estimates and judgements

The preparation of financial statements in conformity with NZ IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Future outcomes could differ from those estimates. The principal areas of judgement in preparing these financial statements are set out below:

#### Valuation of investments

Infratil completes an assessment of the carrying value of investments at least annually and considers objective evidence for impairment on each investment taking into account observable data on the investment, the fair value, the status or context of capital markets, its own view of investment value, and its long term intentions. Infratil notes the following matters which are specifically considered in terms of objective evidence of impairment of its investments, and whether there is a significant or prolonged decline from cost, which should be recorded as an impairment, and taken to profit and loss: any known loss events that have occurred since the initial recognition date of the investments, including its long term investment horizon, specific initiatives which reflect the strategic or influential nature of its existing investment position and internal valuations; and the state of financial markets. The assessment also requires judgements about the expected future performance and cash flows of the investment.

### Accounting for income taxes

Preparation of the financial statements requires management to make estimates as to, amongst other things, the amount of tax that will ultimately be payable, the availability of losses to be carried forward and the amount of foreign tax credits that it will receive. Actual results may differ from these estimates as a result of reassessment by management and/or taxation authorities.

#### (B) Taxation

Income tax comprises both current and deferred tax. Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of the differences between the carrying amounts of assets and liabilities for financial reporting

The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date. A deferred tax asset is recognised only to the extent that it is probable that future taxable profits or deferred tax liabilities will be available within the Infratil Group against which the asset can be utilised.

#### (C) Derivative financial instruments

When appropriate, the Company enters into agreements to manage its interest rate, foreign exchange, operating and investment risks. In accordance with the Company's risk management policies, the Company does not hold or issue derivative financial instruments for speculative purposes. However, certain derivatives do not qualify for hedge accounting and are required to be accounted for at fair value through profit or loss. Derivative financial instruments are recognised initially at fair value at the date they are entered into. Subsequent to initial recognition, derivative financial instruments are stated at fair value at each balance sheet date. The resulting gain or loss is recognised in the profit or loss immediately unless the derivative is designated effective as a hedging instrument, in which event, recognition of any resultant gain or loss depends on the nature of the hedging relationship.

#### (D) Impairment of assets

At each reporting date, the Company reviews the carrying amounts of its tangible and intangible assets, to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

#### (E) Borrowings

Borrowings are recorded initially at fair value, net of transaction costs. Subsequent to initial recognition, borrowings are measured at amortised cost with any difference between the initial recognised amount and the redemption value being recognised in profit and loss over the period of the borrowing using the effective interest rate. Fees and other costs incurred in arranging debt finance are capitalised and amortised over the term of the relevant debt facility.

#### (F) Foreign currency transactions

Transactions in foreign currencies are translated to the functional currency of the Company at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the period. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on translation are recognised in profit or loss.

### (G) Adoption status of relevant new financial reporting standards and interpretations

The following new standards, amendments to standards and interpretations are issued but not yet effective and have not been applied in preparation of these consolidated financial statements.

NZ IFRS 9 Financial Instruments, published in July 2014, replaces the existing guidance in NZ IAS 39 Financial Instruments: Recognition and Measurement. NZ IFRS 9 includes revised guidance on the classification and measurement of financial instruments, a new expected credit loss model for calculating impairment on financial assets, and new general hedge accounting requirements. It also carries forward the guidance on recognition and derecognition of financial instruments from NZ IAS 39. NZ IFRS 9 is effective for annual reporting periods beginning on or after 1 January 2018, with early adoption permitted. The likely impact of this standard has not yet been assessed, however it is not expected to have a material impact on the Group's financial statements.

NZ IFRS 15 Revenue from Contracts with Customers, establishes a comprehensive framework for determining whether, how much and when revenue is recognised. It replaces existing revenue recognition guidance, including NZ IAS 18 Revenue, NZ IAS 11 Construction Contracts and IFRIC 13 Customer Loyalty Programmes. NZ IFRS 15 is effective for annual reporting periods beginning on or after 1 January 2018, with early adoption permitted. The likely impact of this standard has not yet been fully assessed, however it is not expected to have a material impact on the Group's financial statements.

NZ IFRS 16 Leases, removes the classification of leases as either operating leases or finance leases – for the lessee – effectively treating all leases as finance leases. Lessor accounting remains similar to current practice – i.e. lessors continue to classify leases as finance and operating. The standard is effective for annual reporting periods beginning on or after 1 January 2019. The likely impact of this standard has not yet been assessed, however it is not expected to have a material impact on the Group's financial statements.

#### (2) Nature of business

The Company is the ultimate parent company of the Infratil Group, owning infrastructure & utility businesses and investments in New Zealand, Australia and the United States. The Company is a limited liability company incorporated and domiciled in New Zealand. The address of its registered office is 5 Market Lane, Wellington, New Zealand.

#### (3) Infratil shares

	2017	2016
Total issued capital at the beginning of the year	562,325,645	561,875,237
Movements in issued and fully paid ordinary shares during the year: Share buyback (held as treasury stock)	(2,510,000)	_
Treasury Stock reissued under dividend reinvestment plan	-	-
Conversion of executive redeemable shares	237,521	450,408
Total issued capital at the end of the year	560,053,166	562,325,645

All fully paid ordinary shares have equal voting rights and share equally in dividends and equity. At 31 March 2016 the Company held 4,500,000 shares as Treasury Stock. These shares, along with the 2,510,000 shares brought back in the current period were cancelled as at 31 March 2017.

Dividends paid on ordinary shares

Dividends declared and paid by the Company for the year were as follows:	2017	2016	2017	2016
	cents per	cents per	\$000	\$000
	share	share		
Final dividend prior year	9.00	8.00	50,608	44,954
Interim dividend paid current year	5.75	5.25	32,289	29,497
Special dividend paid current year	-	6.40	-	35,960
	14.75	19.65	82,897	110,411

Executive redeemable shares		
	2017	2016
Balance at the beginning of the year	827,500	1,337,500
Shares issued	528,000	-
Shares converted to ordinary shares	(237,521)	(450,408)
Shares cancelled	(127,479)	(59,592)
Balance at end of year	990,500	827,500

During the year no shares were forfeited by executives leaving the Group (2016: nil).

#### (4) Other operating expenses

		2017	2016
		\$000	\$000
Fees paid to the Company auditor		175	174
Directors' fees		664	665
Administration and other corporate costs		7,563	11,175
Management fee (to related party Morrison & Co Infrastructure Management)	15	20,490	20,107
Total other operating expenses		28,892	32,121
		<del>-</del>	

	2017	2016
Fees paid to the Company auditor	\$000	\$000
Audit and review of financial statements	175	174
Other assurance services	-	-
Taxation services	-	-
Total fees paid to the Company auditor	175	174

The audit fee includes the fees for both the annual audit of the financial statements and the review of the interim financial statements.

#### (5) Net realisations and (impairments)

At 31 March 2017 the Company reviewed the carrying amounts of loans to Infratil Group companies to determine whether there is any indication that those assets have suffered an impairment loss. The recoverable amount of the asset was estimated by reference to the counterparties' net asset position and ability to repay loans out of operating cash flows in order to determine the extent of any impairment loss. As a result the Company did not impair any loans to Infratil Group companies in 2017 (2016: nil).

### (6) Taxation

(b) Taxation	2017 \$000	2016 \$000
Surplus before taxation	48,335	3,169
Taxation on the surplus for the year @ 28% tax rate  Plus/(less) taxation adjustments:	13,534	887
Net realisations and (impairments)	-	(126)
Exempt dividends Subvention payment	(16,800)	(6,160)
Timing differences not recognised	16	(0,100)
Under provision in prior years	4,755	12,966
Other permanent differences	634	909
Taxation expense	2,139	8,476
Current taxation	4,053	5,004
Deferred taxation	(1,914)	3,472
	2,139	8,476

There was no income tax recognised in other comprehensive income during the period (2016: nil)

The Infratil New Zealand tax group which includes Infratil Limited is forecasting to derive taxable profits in future periods, sufficient to utilise the tax losses carried forward and deductible temporary differences. As a result deferred tax assets and liabilities have been recognised where they arise, including deferred tax on tax losses carried forward.

less: Bond issue costs capitalised and amortised over term	(7,225)	(7,248)
Balance at the end of the year	998,305	949,771

#### Fixed coupon

The fixed coupon bonds the Company has on issue are at a face value of \$1.00 per bond. Interest is payable quarterly on the bonds. 25 days prior to the maturity date of the IFT090 and IFT160 series, Infratil can elect to redeem the infrastructure bonds in that series at their \$1.00 face value payable in cash or convert all the infrastructure bonds in the relevant series by issuing the number of shares obtained by dividing the \$1.00 face value by the product of the relevant conversion percentage of 98% and the market price. The market price is the average price weighted by volume of all trades of ordinary shares over the 10 business days up to the fifth business day before the maturity date.

#### Perpetual Infratil infrastructure bonds ('PIIBs')

The Company has 231,916,600 (2016: 233,405,600) infrastructure bonds (series 20) on issue at a face value of \$1.00 per bond. Interest is payable quarterly on the bonds. For the year to 15 November 2017 the coupon is fixed at 3.63% per annum. Thereafter the rate will be reset annually at 1.5% per annum over the then one year bank rate (quarterly), unless Infratil's gearing ratio exceeds certain thresholds, in which case the margin increases. These infrastructure bonds have no fixed maturity date. 1,489,000 PIIBs were repurchased by Infratil Limited during the year (2016: 1,452,000). Throughout the period the Company complied with all debt covenant requirements as imposed by the Bond Trustee.

At 31 March 2017 the Infratil Infrastructure bonds (including PIIBs) had a fair value of \$943.8 million (2016: \$924.6 million).

#### (8) Financial instruments

The Company has exposure to the following risks due to its business activities and financial policies:

- Credit risk
- Liquidity risk
- Market risk (interest rates and foreign exchange)

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board also has a function of reviewing management practices in relation to identification and management of significant business risk areas and regulatory compliance. The Company has developed a comprehensive, enterprise wide risk management framework. Management and Board participate in the identification, assessment and monitoring of new and existing risks. Particular attention is given to strategic risks that could affect the Company.

#### Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations, resulting in financial loss to the Company. The Company is exposed to credit risk in the normal course of business including those arising from trade receivables, financial derivatives and transactions (including cash balances) with financial institutions. The Company has adopted a policy of only dealing with credit-worthy counterparties, as a means of mitigating the risk of financial loss from defaults. The Company minimises its exposure to credit risk of trade receivables through the adoption of counterparty credit limits and standard payment terms. Derivative counterparties and cash transactions are limited to high-credit-quality financial institutions and other organisations in the relevant industry. The Company's exposure and the credit ratings of counterparties are monitored. The carrying amounts of financial assets recognised in the Statement of Financial Position best represent the Company's maximum exposure to credit risk at the reporting date. No security is held on these amounts.

#### Trade and other receivables

The Company has exposure to various counterparties. Credit risk with respect to trade receivables is limited due to the Company's customer base being restricted to subsidiaries within the Group for the most part.

#### Liquidity risk

Liquidity risk is the risk that assets held by the Company cannot readily be converted to cash to meet the Company's contracted cash flow obligations. Liquidity risk is monitored by continuously forecasting cash flows and matching the maturity profiles of financial assets and liabilities. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due and make value investments, under both normal and stress conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The tables below analyses the financial liabilities into relevant maturity groupings based on the earliest possible contractual maturity date at the year end date. The amounts in the tables below are contractual undiscounted cash flows, which include interest through to maturity. Perpetual Infratil Infrastructure Bond cash flows have been determined by reference to the longest dated Infratil Bond, maturing in the year 2024.

#### Market risk

#### Interest rates

Interest rate risk is the risk of interest rate volatility negatively affecting the Company's interest expense cash flow and earnings. The Company mitigates this risk by issuing borrowings at fixed interest rates or entering into Interest Rate Swaps to convert floating rate exposures to fixed rate exposure. Borrowings issued at fixed rates expose the Company to fair value interest rate risk which is managed by the interest rate profile and hedging.

At balance date the face value of interest rate contracts outstanding were: Interest rate swaps in place at year end

Fair value of interest rate swaps

The termination dates for the interest rate swaps are as follows:

Between 0 to 1 year Between 1 to 2 years Between 2 to 5 years Over 5 years

2017	2016
\$000	\$000
145,000	145,000
(16,673)	(22,774)
- 50,000 95,000 -	100,000 45,000

#### Interest rate sensitivity analysis

The following table shows the impact on post-tax profit and equity of a movement in bank interest rates of 100 basis points

Profit or loss 100 bp increase 100 bp decrease

2,386	3,879
(2,526)	(4,116)

There would be no material effect on equity.

#### Foreign currency

The Company has exposure to currency risk on the value of its assets and liabilities denominated in foreign currencies, future investment obligations and future income. Foreign currency obligations and income are recognised as soon as the flow of funds is likely to occur. Decisions on buying forward cover for likely foreign currency investments is subject to the Company's expectation of the fair value of the relevant exchange rate.

#### Foreign exchange sensitivity analysis

At 31 March 2017, if the New Zealand dollar had weakened/strengthened by 10 percent against foreign currencies, with all other variables held consistent, post-tax profit would not have been materially different. There would have been no material impact on balance sheet components.

#### Fair values

The carrying amount of financial assets and financial liabilities recorded in the financial statements is their fair value, with the exception of bond debt held at amortised cost which have a fair value at 31 March 2017 of \$943.8 million (2016: \$924.6 million) compared to a carrying value of \$998.3 million (2016: \$949.8 million).

	2017 \$000	2016 \$000

Derivative financial instruments - foreign exchange	-	-
Derivative financial instruments - interest rate	-	_
	-	-
Split as follows:		
Current	-	-
Non-current	-	-
	-	-
Liabilities		
Derivative financial instruments - foreign exchange	-	-
Derivative financial instruments - interest rate	16,673	22,774
	16,673	22,774
Split as follows:		
Current	-	-
Non-current Non-current	16,673	22,774
	16,673	22,774

#### Estimation of fair values

The fair values and net fair values of financial assets and financial liabilities are determined as follows:

- The fair value of financial assets and liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices.
- The fair value of other financial assets and liabilities are calculated using market-quoted rates based on discounted cash flow analysis.
- The fair value of derivative financial instruments are calculated using quoted prices. Where such prices are not available, use is made of discounted cash flow analysis using the applicable yield curve or available forward price data for the duration of the instruments.

Where the fair value of a derivative is calculated as the present value of the estimated future cash flows of the instrument, the two key types of variables used by the valuation techniques are:

- forward price curve (for the relevant underlying interest rates, foreign exchange rates or commodity prices); and
- discount rates.

The selection of variables requires significant judgement and therefore there is a range of reasonably possible assumptions in respect of these variables that could be used in estimating the fair value of these derivatives. Maximum use is made of observable market data when selecting variables and developing assumptions for the valuation techniques.

All financial instruments measured at fair value in the statement of financial position are valued either directly (that is, using external available inputs) or indirectly (that is, derived from external available inputs) and are classified as level 2 under NZ IFRS 7.

Valuation Input	Source
Interest rate forward price curve	Published market swap rates
Discount rate for valuing interest rate derivatives	Published market interest rates as applicable to the
	remaining life of the instrument.

#### Fair value hierarchy

The analyses of financial instruments carried at fair value, by valuation method is below. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1)
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2)
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The Company has interest rate swap derivatives that are classified as Level 2 and have a fair value liability of \$16.7 million at 31 March 2017 (2016: \$22.8 million).

There were no transfers between derivative financial instrument assets or liabilities classified as level 1 or level 2, and level 3 of the fair value hierarchy during the year ended 31 March 2017 (2016: none).

#### Capital management

The key factors in determining the Company's optimal capital structure are:

- Nature of its activities
- Quality and dependability of earnings/cash flows
- Capital needs over the forecast period
- Available sources of capital and relative cost

There were no changes to the Company's approach to capital management during the year.

The Company seeks to ensure that no more than 25% of its non-bank debt is maturing in any one year period, and to spread the maturities of its facilities. The Company manages its interest rate profile so as to minimise net value volatility. This means having interest costs fixed for extended terms. At times when long rates appear to be unsustainably high, the profile may be shortened, and when rates are low the profile may be lengthened.

# (9) Investment in subsidiaries and associates

The significant investments of the Company and their activities are summarised below:

Subsidiaries	Holding	Holding	Principal	Country of
	2017	2016	activity	incorporation

Change in taxation and deferred tax	(1,403)	3,473
Net cash inflow from operating activities	39,856	8,005

#### (11) Share Scheme

#### Infratil Executive Redeemable Share Scheme

From time to time selected key eligible executives and senior managers of Infratil and certain of its subsidiaries are invited to participate in the Infratil Executive Redeemable Share Scheme ('Executive Scheme') to acquire Executive Redeemable Shares ('Executive Shares'). The Executive Shares have certain rights and conditions and cannot be traded and do not convert to ordinary shares until those conditions have been met. The Executive Shares confer no rights to receive dividends or other distributions or to vote. Executive Shares may be issued which will convert to ordinary shares after three years (other than in defined circumstances) provided that the issue price has been fully paid and vesting conditions have been met. The vesting conditions include share performance hurdles with minimum future share price targets which need to be achieved over the specified period. The number of shares that "vest" (or LTI bonus paid) is based on the share price performance over the relevant period of the Infratil ordinary shares. If the executive is still employed by the Group at the end of the specified period, provided the share performance hurdles are met the employee receives a long term incentive bonus ('LTI') which must be used to repay the outstanding issue price of the Executive Shares and the Executive Shares are then converted to fully paid ordinary shares of Infratil.

528,000 Infratil Executive Redeemable Shares were granted at a price of \$3.3107 on 17 June 2016 (no new shares were issued in the prior year), at the volume weighted average market price over the 20 business days immediately preceding the date on which the shares were issued to each executive. One cent per Executive Share was paid up in cash by the executive with the balance of the issue price payable when the executive becomes eligible to receive the long term incentive bonus.

On 17 December 2016, the 2013 Executive Scheme matured having met certain share performance thresholds. Pursuant to this and the Trust Deed, the Company converted 237,521 Executive Shares into Infratil Ordinary Shares on 22 December 2016. On 11 December 2015, the 2012 Executive Scheme matured having met certain share performance thresholds. Pursuant to this and the Trust Deed, the Company converted 318,386 Executive Shares into Infratil Ordinary Shares on 15 January 2016.

On 10 December 2015, the Company accelerated the entitlements of executives of iSite Limited under the 2012, 2013 and 2014 Executive Schemes, pursuant to the Infratil Limited Executive Share Scheme Trust Deed dated 22 August 2008 (the Trust Deed), to allow those executives the benefit of that Scheme on completion of the sale of iSite. As a consequence, the Company converted 132,022 Executive Shares into Infratil Ordinary Shares on 22 December 2015.

#### Infratil Staff Share Purchase Scheme

In 2008 Infratil commenced a staff share purchase scheme (the "Staff Share Scheme"). Under the Staff Share Scheme participating employees have a beneficial title to the ordinary shares, which are held by a trustee company. Staff are provided a loan in respect of the shares which is repayable over a period of three years. Upon repayment of the loan and three years' service by the participating employee, the ordinary shares will transfer from the trustee company to the participating employee, and the shares become unrestricted. Other than in exceptional circumstances, the length of the retention period before the shares vest is three years during which time the ordinary shares cannot be sold or disposed of.

During the year 44,557 shares were transferred to employees under the scheme (2016: 45,755 shares).

#### (12) Commitments

There are no outstanding commitments (2016: nil).

#### (13) Contingent liabilities

The Company and certain wholly owned subsidiaries are guarantors of the bank debt facilities of Infratil Finance Limited under a Deed of Negative Pledge, Guarantee and Subordination and the Company is a guarantor to certain obligations of subsidiary companies. During the year a A\$47.6 million secured bank facility of a non-wholly owned subsidiary has been refinanced with an expiry date of 21 May 2018. This facility, and certain other indebtedness with the financier, has been guaranteed by Infratil Finance Limited and the Company.

The Company has a contingent liability under the international fund management agreement with Morrison & Co International Limited in the event that the Group sells its international assets, or valuation of the assets exceeds the performance thresholds set out in the management agreement.

The Company has agreed to guarantee certain obligations of Infratil Trustee Limited, a related party, that is the Trustee to the Infratil Staff Share Scheme. The amount of the guarantee is limited to the loans provided to the employees.

#### (14) Related parties

Certain Infratil Directors have relevant interests in a number of companies with which Infratil has transactions in the normal course of business. A number of key management personnel are also Directors of Group subsidiary companies and associates.

Morrison & Co Infrastructure Management Limited ('MCIM') is the management company for the Company and receives management fees in accordance with the applicable management agreement.

MCIM is owned by H.R.L. Morrison & Co Group Limited Partnership ('MCO'). Mr M Bogoievski is a director of Infratil and is a director and Chief Executive Officer of MCO. Entities associated with Mr Bogoievski also have beneficial interests in MCO.

The Company has the following significant loans and investments to/from/in its subsidiaries:

	Interest income/(expense)		<u>Interco</u> mpany	
Related Party	2017	2016	2017	2016
	\$000	\$000	\$000	\$000
Advances				
Infratil Finance	56,852	60,000	973,844	1,224,480
Aotea Energy Holdings Limited	-	-	(153,897)	(153,897)
Investments in				
Infratil Investments Limited			87,665	87,665

Infratil PPP Limited			5,942	5,942
Infratil No. 5 Limited			248,001	-

Note 9 identifies significant entities in which the Company has an interest. All of these are related parties of the Company.

Management and other fees paid by the Group (including associates) to MCIM, MCO or its related parties during the year were:

	2017 \$000	2016 \$000
Management fees	20,490	20,107
Executive secondment and consulting	-	-
Directors fees	100	98
Financial management, accounting, treasury, compliance and administrative services	1,250	1,250
Investment banking services	1,289	1,627
Total management and other fees	23,129	23,082

At 31 March 2017 amounts owing to MCIM of \$1,872k (excluding GST) are included in trade creditors (2016: \$1,838k).

#### (15) Management fee to Morrison & Co Infrastructure Management Limited ('MCIM')

The management fee to MCIM comprises a number of different components:

A New Zealand base management fee is paid on the "New Zealand Company Value" at the rates of 1.125% per annum on New Zealand Company value up to \$50 million. 1.0% per annum on the New Zealand Company Value between \$50 million and \$150 million, and 0.80% per annum on the New Zealand Company Value above \$150 million. The New Zealand Company Value is:

- the Company's market capitalisation as defined in the management agreement (i.e. the aggregated market value of the Company's listed securities, being ordinary shares, partly paid shares, infrastructure bonds and warrants):
- plus the Company and its wholly owned subsidiaries' net debt (excluding listed debt securities and the book value of the debt in any non-Australasian investments):
- minus the cost price of any non-Australasian investments: and
- plus/minus an adjustment for foreign exchange gains or losses related to non-New Zealand investments.

An international fund management fee is paid at the rate of 1.50% per annum on:

- the cost price of any non-Australasian investments: plus
- the book value of the debt in any wholly owned non-Australasian investments.

An international fund incentive fee is payable at the rate of 20% of gains on the international (including Australian) assets in excess of 12% per annum post tax.

#### (16) Segment analysis

During the year, the Company operated in predominantly one business segment, that of investments.

#### Geographical segments

The Company operated in one geographical area, that of New Zealand. Certain subsidiaries of the Company invest in Australia and the United States.

#### (17) Events after balance date

#### Dividend

On 17 May 2017 the Directors have approved a fully imputed final dividend of 10 cents per share to holders of fully paid ordinary shares to be paid on the 15th of June 2017.

There have been no other significant events subsequent to balance date.

# Independent Auditor's Report

To the shareholders of Infratil Limited

#### Report on the financial statements

# **Opinion**

In our opinion, the accompanying financial statements of Infratil Limited (the company) on pages 1 to 17:

- i. present fairly in all material respects the company's financial position as at 31 March 2017 and its financial performance and cash flows for the year ended on that date; and
- ii. comply with New Zealand Equivalents to International Financial Reporting Standards and International Financial Reporting Standards.

We have audited the accompanying financial statements which comprise:

- the statement of financial position as at 31 March 2017;
- the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended; and
- notes, including a summary of significant accounting policies and other explanatory information.

### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (New Zealand) ("ISAs (NZ)"). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the company in accordance with Professional and Ethical Standard 1 (Revised) Code of Ethics for Assurance Practitioners issued by the New Zealand Auditing and Assurance Standards Board and the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

Our responsibilities under ISAs (NZ) are further described in the Auditor's Responsibilities for the Audit of the financial statements section of our report.

Our firm has also provided other services to the company in relation to other assurance engagements. These matters have not impaired our independence as auditor of the company. The firm has no other relationship with, or interest in, the company.

# **Use of this Independent Auditor's Report**

This report is made solely to the shareholders as a body. Our audit work has been undertaken so that we might state to the shareholders those matters we are required to state to them in the Independent Auditor's Report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the shareholders as a body for our audit work, this report, or any of the opinions we have formed.

# **Responsibilities of the Directors for the financial statements**

The Directors, on behalf of the company, are responsible for:

- the preparation and fair presentation of the financial statements in accordance with generally accepted accounting practice in New Zealand (being New Zealand Equivalents to International Financial Reporting Standards) and International Financial Reporting Standards;
- implementing necessary internal control to enable the preparation of a set of financial statements that is fairly presented and free from material misstatement, whether due to fraud or error; and
- assessing the ability to continue as a going concern. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate or to cease operations, or have no realistic alternative but to do so.

# × Auditor's Responsibilities for the Audit of the financial statements

Our objective is:

- to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error; and
- to issue an Independent Auditor's Report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs NZ will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of these financial statements is located at the External Reporting Board (XRB) website at:

https://www.xrb.govt.nz/Site/Auditing Assurance Standards/Current Standards/Page1.aspx
